

Journey to Federal IT Modernization

DATA TO INSIGHT

MeriTalk, in partnership with Cohesity, examined data management speedbumps and best practices on the Federal government's journey to a modern, data-driven future.

JOURNEY TO MODERNIZATION

The Federal government is **spending more than ever** on modernization – with IT funding up to **\$89.3B in 2020**¹

But while **73%** of Feds say their agency has a defined IT modernization roadmap

Just **24%** rate their efforts to date as excellent²

DATA SPEEDBUMPS

70%
of Federal IT managers

say they are **most concerned** about data security, privacy, and integrity in the cloud³

91%
of global IT decision-makers

point to **mass data fragmentation** as the reason public cloud has yet to fully deliver on its promise⁴

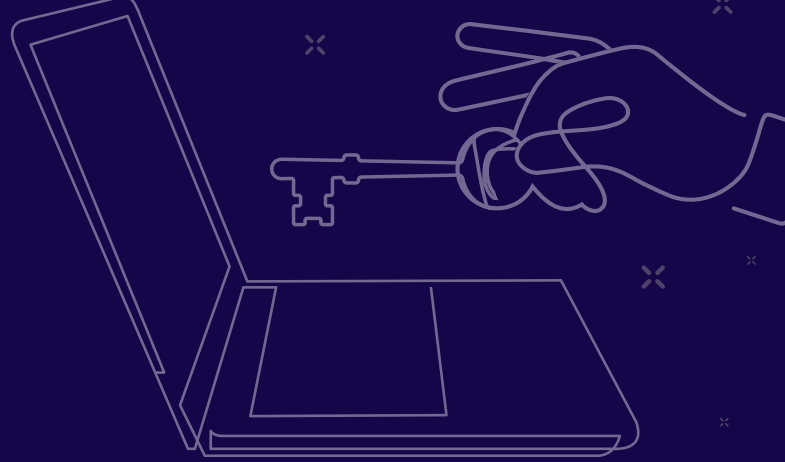

#1
OPPORTUNITY

Feds agree **improving data sharing** is the #1 opportunity to accelerate modernization²

SECURITY POTHOLES

More than half of Feds say their current level of complexity and lack of visibility is putting them at **significant risk** for a security breach⁵

Still, most are focused on **traditional security methods**⁶

REROUTING: DESTINATION MODERNIZATION

88%
of global IT decision makers

believe the benefits of the public cloud can be realized if solutions are in place to **solve mass data fragmentation challenges** across their multi-cloud environments⁴

Additionally,

89%
of Federal IT leaders

say **hyper converged infrastructure (HCI)** could accelerate core modernization efforts like cloud, automation, and advanced analytics⁷

To succeed:

CONSOLIDATE

solutions for backup, archiving, analytics, etc. onto a single platform

MANAGE

all aspects of secondary storage through a single GUI

RUN

applications on the same platform to accelerate digital transformation

Some of the work that we will do in the data area is the most important work for how we position ourselves for decades to come”

–Suzette Kent, Federal CIO

Cohesity helps Federal agencies reinvent data management strategies to eliminate mass data fragmentation and embrace modernization.
